I-LITE, 4.3 WATT LED DRIVER

(Common-Cathode, One to Six Channels)

GENERAL DESCRIPTION

The ACI-A036020-2514 LED Driver is a true constant current source capable of driving up to 6 parallel channels of series connected LEDs with a forward voltage drop up to 36V.

This driver provides a complete integrated solution that operates over an input voltage range from +10V to +18V.

Simple to connect and operate, this driver is capable of providing precise control to support dimming applications with a minimum of 3000:1.

Please refer to Table 1 on page 3, for the maximum output current per channel, based on the number of channels connected.

This unit features enable and intensity control inputs and is designed to work with the Digital View LCD Controller and Button Board (see page 3 for more information).
