I-LITE, 9.1 WATT LED DRIVER

(Common-Cathode, One to Six Channels)

GENERAL DESCRIPTION

The ACI-A038040-2093 is designed to drive up to 6 parallel channels of series connected LEDs.

The number of channels and current per channel are configurable per Table 1 on Page 3, by setting a four-position switch located on the driver, enabling the driver to support a wide range of displays.

Operating as a true constant current source, the driver provides a complete integrated solution that operates over an input voltage range from +4.75V to +9.0V DC.

This unit features enable and intensity control inputs.

Additional Support Documentation:

1. Application Note AN-OP1
