

I-DRIVE, 10.5 WATT LED DRIVER (35V, 1 to 6 Channels, 0-50mA per channel)

GENERAL DESCRIPTION

The ACI-N035300-2675 is an exact drop-in replacement, in terms of form, fit and function to the **NLT 65PW01F, 104PW01F, 104PW03F, 121PW02F and 150PW02F** LED Drivers, with improved efficiency.

The ACI-N035300-2675 operates as a true constant current source and is capable of driving up to six channels of series connected LEDs with a forward voltage drop up to 35V. This driver provides a complete integrated solution that is regulated over an input voltage range from +10 to +15VDC.

This unit features enable and three types of intensity control inputs.
