Product Specification

1. General Description

LM201U05-SLL1 is a Color Active Matrix Liquid Crystal Display with an integral Cold Cathode Fluorescent Lamp(CCFL) backlight system. The matrix employs a-Si Thin Film Transistor as the active element. It is a transmissive type display operating in the normally black mode. It has a 20.1 inch diagonally measured active display area with UXGA resolution (1200 vertical by 1600 horizontal pixel array) Each pixel is divided into Red, Green and Blue sub-pixels or dots which are arranged in vertical stripes. Gray scale or the brightness of the sub-pixel color is determined with a 8-bit gray scale signal for each dot, thus, presenting a palette of more than 16,7M(True) colors.

It has been designed to apply the 8Bit 2 port LVDS interface.

It is intended to support displays where high brightness, super wide viewing angle, high color saturation, and high color are important.

General Features

Active Screen Size	20.1 inches(510.54mm) diagonal
Outline Dimension	432.0(H) x 331.5(V) x 25.0(D) mm(Typ.)
Pixel Pitch	0.255mm x 0.255mm
Pixel Format	1600 horizontal By 1200 vertical Pixels RGB stripe arrangement
Color Depth	8bit, 16,7 M colors
Luminance, White	300 cd/m ² (Center 1 point, Typ.)
Viewing Angle (CR>10)	Viewing Angle Free (R/L 178(Typ.), U/D 178(Typ))
Power Consumption	Total 35.38 Watt(Typ.) (5.98 Watt@V _{LCD} , 29.4 Watt@300cd/[LAMP=7mA])
Weight	3200 g (Typ.)
Display Operating Mode	Transmissive mode, normally black
Surface Treatment	Hard coating (3H), Anti-glare treatment of the front polarizer

Product Specification

2. Absolute Maximum Ratings

The following are maximum values which, if exceeded, may cause faulty operation or damage to the unit.

Table 1. ABSOLUTE MAXIMUM RATINGS

Parameter	Symbol	Values		Units	Notes
		Min	Max		
Power Input Voltage	V _{LCD}	-0.3	23.0	V _{dc}	at 25 ± 2 °C
Operating Temperature	T _{OP}	0	50	°C	1
Storage Temperature	T _{ST}	-20	60	°C	1
Operating Ambient Humidity	H _{OP}	10	90	%RH	1
Storage Humidity	H _{ST}	10	90	%RH	1

Note : 1. Temperature and relative humidity range are shown in the figure below.
Wet bulb temperature should be 39 °C Max, and no condensation of water.

Product Specification

3. Electrical Specifications

3-1. Electrical Characteristics

It requires two power inputs. One is employed to power the LCD electronics and to drive the TFT array and liquid crystal. The second input power for the CCFL, is typically generated by an inverter. The inverter is an external unit to the LCDs.

Table 2_1. ELECTRICAL CHARACTERISTICS

Parameter	Symbol	Values			Unit	Notes
		Min	Typ	Max		
MODULE :						
Power Supply Input Voltage	V _{LCD}	17V	18V	19V	V _{dc}	
Power Supply Input Current	I _{LCD}	-	332	382	mA	1
		-	419	481	mA	2
Power Consumption	P _{LCD}	-	5.98	6.88	Watt	1
Rush current	I _{RUSH}	-	-	3	A	3

Note :

1. The specified current and power consumption are under the V_{LCD}=18.0V, 25 ± 2°C, f_V=60Hz condition whereas mosaic pattern(8 x 6) is displayed and f_V is the frame frequency.
2. The current is specified at the maximum current pattern.
3. The duration of rush current is about 2ms and rising time of power Input is 1ms(min.).

White : 255Gray
Black : 0Gray

Product Specification

Table 2_2. ELECTRICAL CHARACTERISTICS

Parameter		Symbol	Values			Unit	Notes
			Min	Typ	Max		
LAMP :							
Operating Voltage		VBL	670(8.0mA)	700	825(3mA)	V _{RMS}	1, 3
Operating Current		IBL	3.0	7.0	8.0	mA _{RMS}	2
Established Starting Voltage		Vs					2, 4
	at 25 °C				1150	V _{RMS}	
	at 0 °C				1450	V _{RMS}	
Operating Frequency		fBL	40	50	80	kHz	5
Discharge Stabilization Time		Ts	-	-	3	Min	2, 6
Power Consumption		PBL		29.4	32.3	Watt	7
Life Time			45,000			Hrs	2, 8

Note : The design of the inverter must have specifications for the lamp in LCD Assembly.

The performance of the Lamp in LCM, for example life time or brightness, is extremely influenced by the characteristics of the DC-AC inverter. So all the parameters of an inverter should be carefully designed so as not to produce too much leakage current from high-voltage output of the inverter.

When you design or order the inverter, please make sure unwanted lighting caused by the mismatch of the lamp and the inverter (no lighting, flicker, etc) never occurs. When you confirm it, the LCD-Assembly should be operated in the same condition as installed in you instrument.

※ Do not attach a conducting tape to lamp connecting wire.

If the lamp wire attach to a conducting tape, TFT-LCD Module has a low luminance and the inverter has abnormal action. Because leakage current is occurred between lamp wire and conducting tape.

1. It is only reference voltage in LCM.
2. Specified values are for a single lamp.
3. Operating voltage is measured at $25 \pm 2^\circ\text{C}$.
4. The voltage above V_S should be applied to the lamps for more than 1 second for start-up.
(Inverter open voltage must be more than lamp starting voltage.)
Otherwise, the lamps may not be turned on. The used lamp current is the lamp typical current.
5. Lamp frequency may produce interface with horizontal synchronous frequency and as a result this may cause beat on the display. Therefore lamp frequency shall be as away possible from the horizontal synchronous frequency and from its harmonics in order to prevent interference.
6. Let's define the brightness of the lamp after being lighted for 5 minutes as 100%.
T_S is the time required for the brightness of the center of the lamp to be not less than 95%.
7. The lamp power consumption shown above does not include loss of external inverter.
The used lamp current is the lamp typical current. ($P_{BL} = V_{BL} \times I_{BL} \times N_{Lamp}$)
8. The life is determined as the time at which brightness of the lamp is 50% compared to that of initial value at the typical lamp current on condition of continuous operating at $25 \pm 2^\circ\text{C}$.

Product Specification

9. The output of the inverter must have symmetrical(negative and positive) voltage waveform and symmetrical current waveform (Unsymmetrical ratio is less than 10%). Please do not use the inverter which has unsymmetrical voltage and unsymmetrical current and spike wave.
- Requirements for a system inverter design, which is intended to have a better display performance, a better power efficiency and a more reliable lamp, are following.
- It shall help increase the lamp lifetime and reduce leakage current.
- The asymmetry rate of the inverter waveform should be less than 10%.
 - The distortion rate of the waveform should be within $\sqrt{2} \pm 10\%$.
- * Inverter output waveform had better be more similar to ideal sine wave.

* Asymmetry rate:

$$|I_p - I_{-p}| / I_{rms} \times 100\%$$

* Distortion rate

$$I_p \text{ (or } I_{-p}) / I_{rms}$$

10. The inverter which is combined with this LCM, is highly recommended to connect coupling(ballast) condenser at the high voltage output side. When you use the inverter which has not coupling(ballast) condenser, it may cause abnormal lamp lighting because of biased mercury as time goes.
11. In case of edgy type back light with over 4 parallel lamps, input current and voltage wave form should be synchronized

Product Specification

3-2. Interface Connections

- LCD Connector(CN1) : AL230F-ALG1D-P (Manufactured by P-TWO) or IS100-L30R-C23 (Manufactured by UJU) or Equivalent
- Mating Connector : FI-X30M (Manufactured by JAE) or Equivalent

21	FCLKINP	Plus signal of odd clock channel (LVDS)
22	FCLKINM	Minus signal of odd clock channel (LVDS)
23	FR2P	Plus signal of odd channel 2 (LVDS)
24	FR2M	Minus signal of odd channel 2 (LVDS)
25	FR1P	Plus signal of odd channel 1 (LVDS)
26	FR1M	Minus signal of odd channel 1 (LVDS)
27	FR0P	Plus signal of odd channel 0 (LVDS)
28	FR0M	Minus signal of odd channel 0 (LVDS)
29	GND	Ground
30	GND	Ground

Second data

First data

- Note: 1. NC: No Connection.
2. All GND(ground) pins should be connected together and to Vss which should also be connected to the LCD's metal frame.
3. All VLCD (power input) pins should be connected together.
4. Input Level of LVDS signal is based on the IEA 664 Standard.

Table 5. BACKLIGHT CONNECTOR PIN CONFIGURATION(CN2,CN3,CN4,CN5)

The backlight interface connector is a model 1674817-1(CN2/CN3) manufactured by AMP (or equivalent BHSR-02VS-1 manufactured by JST) and BHR-05VS-1 (CN1/CN4) manufactured by JST. The mating connector part number are SM02B-BHSS-1-TB(2pin), SM04(9-E2)B-BHS-1-TB or equivalent. The pin configuration for the connector is shown in the table below.

No	Pin	Symbol	Description	Notes
CN2	1	HV	Power supply for lamp 1(High voltage side)	1
	2	HV	Power supply for lamp 2(High voltage side)	1
	3	NC	NC	
	4	LV	Power supply for lamp 1(Low voltage side)	2
	5	LV	Power supply for lamp 2(Low voltage side)	2
CN3	1	HV	Power supply for lamp 3(High voltage side)	1
	2	LV	Power supply for lamp 3(Low voltage side)	2
CN4	1	HV	Power supply for lamp 4(High voltage side)	1
	2	LV	Power supply for lamp 4(Low voltage side)	2
CN5	1	HV	Power supply for lamp 6(High voltage side)	1
	2	HV	Power supply for lamp 5(High voltage side)	1
	3	NC	NC	
	4	LV	Power supply for lamp 6(Low voltage side)	2
	5	LV	Power supply for lamp 5(Low voltage side)	2

Notes: 1. The high voltage power terminal is thick line.
2. The low voltage power terminal is thin line.

Product Specification

3-3. Signal Timing Specifications

This is the signal timing required at the input of the User connector. All of the interface signal timing should be satisfied with the following specifications for it's proper operation.

Table 6. Timing Table

ITEM		SYMBOL	Min	Typ	Max	Unit	Note
DCLK	Period	tCLK	14.28	15.625	16.00	ns	
	Frequency	fCLK	62.5	64.0	70.0	MHz	2pixel/clock
Hsync	Period	tHP	852	860	906	tCLK	
	Width-Active	tWH	16	16	16		
Vsync	Period	tVP	1230	1240	1250	tHP	
	Frequency	fV	59	60	61	Hz	
	Width-Active	tWV	2	4	4	tHP	
Data Enable	Horizontal Valid	tHV	800	800	800	tCLK	
	Horizontal Back Porch	tHBP	20	24	48		
	Horizontal Front Porch	tHFP	16	20	42		
	Horizontal Blank	-	52	60	106		
	Vertical Valid	tVv	1200	1200	1200	tHP	
	Vertical Back Porch	tVBP	24	32	42		
	Vertical Front Porch	tVFP	4	4	4		
	Vertical Blank	-	30	40	50		

Notes: Hsync period and Hsync width-active should be even number times of tCLK. If the value is odd number times of tCLK, display control signal can be asynchronous. In order to operate this LCM a Hsync, Vsync, and DE(data enable) signals should be used.

1. The performance of the electro-optical characteristics may be influenced by variance of the vertical refresh rates.
2. Vsync and Hsync should be keep the above specification.
3. Hsync Period, Hsync Width, and Horizontal Back Porch should be any times of of character number(8).
4. The polarity of Hsync, Vsync is not restricted.

3-4. Signal Timing Waveforms

Product Specification

3-5. Color Data Reference

The Brightness of each primary color(red,green,blue) is based on the 8-bit gray scale data input for the color; the higher the binary input, the brighter the color. The table below provides a reference for color versus data input.

Table 7. COLOR DATA REFERENCE

Color		Input Color Data																							
		RED								GREEN								BLUE							
		MSB						LSB		MSB						LSB		MSB							LSB

Product Specification

Notes 1. Contrast Ratio(CR) is defined mathematically as :

$$\text{Contrast Ratio} = \frac{\text{Surface Luminance with all white pixels}}{\text{Surface Luminance with all black pixels}}$$

2. Surface luminance is luminance value at No.1 point across the LCD surface 50cm from the surface with all pixels displaying white. For more information see FIG 2.

3. The variation in surface luminance , δ WHITE is defined as :

$$\delta_{\text{WHITE}} = \frac{\text{Minimum}(L_{\text{on1}}, L_{\text{on2}}, \dots, L_{\text{on9}})}{\text{Maximum}(L_{\text{on1}}, L_{\text{on2}}, \dots, L_{\text{on9}})} \times 100(\%)$$

Measuring point for surface luminance & measuring point for luminance variation

FIG. 2 Measure Point for Luminance

Product Specification

4. **The response time** is defined as the following figure and shall be measured by switching the input signal for “black” and “white”.

Response time is the time required for the display to transition from black to white (Rise Time, T_{rR}) and from white to black (Decay Time, T_{rD}).

FIG. 3 Response Time

5. **The Gray to Gray response time** is defined as the following figure and shall be measured by switching the input signal for “Gray To Gray”.

- Gray step : 5 Step
- T_{GTG_AVR} is the total average time at rising time and falling time for “Gray To Gray”.
- T_{GTG_MAX} is the max time at rising time or falling time for “Gray To Gray”.

Gray to Gray		Rising Time				
		G255	G191	G127	G63	G0
Falling Time	G255					
	G191					
	G127					
	G63					
	G0					

Product Specification

6. **Color shift** is the angle at which the color difference is lower than 0.04.

- Color difference ($\Delta u'v'$)

$$u' = \frac{4x}{-2x + 12y + 3}$$

$$v' = \frac{9y}{-2x + 12y + 3}$$

$$\Delta u'v' = \sqrt{(u'_1 - u'_2)^2 + (v'_1 - v'_2)^2}$$

u'_1, v'_1 : $u'v'$ value at viewing angle direction

u'_2, v'_2 : $u'v'$ value at front ($\theta=0$)

- Pattern size : 25% Box size

- Viewing angle direction of color shift : Horizontal, Vertical

25% Box size

Viewing angle direction

Average RGB values in Bruce RGB for Macbeth Chart

	Dark skin	Light skin	Blue sky	Foliage	Blue flower	Bluish green
R	98	206	85	77	129	114
G	56	142	112	102	118	199

B	240	206	155	110	63	22

Product Specification

7. **Viewing angle(general)** is the angle at which the contrast ratio is greater than 10.
8. **Effective viewing angle** is the angle at which the gamma shift of gray scale is lower than 0.3.

Fig. 1. Sample Luminance vs. gray scale (using a 256 bit gray scale).

$$L = aV^r + L_b$$

Fig. 2. Sample Log-log plot of luminance vs. gray scale.

$$\log(L - L_b) = r \log(V) + \log(a)$$

FIG. 4

Here the Parameter α and γ relate the signal level V to the luminance L.
The GAMMA we calculate from the log-log representation (Fig. 4)

9. Gray scale specification

Gamma Value is approximately 2.2. For more information see Table 10.

Table 10. Gray Scale Specification

Gray Level	Relative Luminance [%] (Typ.)
0	0.12
31	1.20
63	4.57
95	11.3
127	21.4
159	35.2
191	52.8
223	74.4
255	100

Product Specification

5. Mechanical Characteristics

The contents provide general mechanical characteristics. In addition the figures in the next page are detailed mechanical drawing of the LCD.

Outside dimensions	Horizontal	432.0 ± 0.5mm
	Vertical	331.5 ± 0.5mm
	Depth	25.0 ± 0.5 mm
Bezel area	Horizontal	413.0 mm
	Vertical	311.0 mm
Active display area	Horizontal	408.0 mm
	Vertical	306.0 mm
Weight (approximate)	3,200g (Typ.) / 3250g (Max)	
Surface Treatment	Hard coating (3H) Anti-glare treatment of the front polarizer Haze (25%)	

Notes : Please refer to a mechanic drawing in terms of tolerance at the next page.

Product Specification

Product Specification

NOTES

1. Unspecified tolerances are to be $\pm 0.5\text{mm}$.
2. Both backlight wires and contraction tubes are excluded from outline dimensions.
3. Tilt and partial disposition tolerance of display area are as following.
 - (1) Y-Direction : IA-BI $\leq 1.0\text{mm}$
 - (2) X-Direction : IC-DI $\leq 1.0\text{mm}$
4. I/F Connector Specification : IS100-L30R-C23
5. Lamp Connector Specification
 - BHSR-02VS-1(JST)
 - BHR-05VS-1(JST)
6. Lamp(CFL) lot No.is marked at backlight connector.

7. Do not wrap conductive tapes around the backlight wires.

Product Specification

6. Reliability

Environment test condition

No	Test Item	Condition
1	High temperature storage test	Ta= 60°C 240h
2	Low temperature storage test	Ta= -20°C 240h
3	High temperature operation test	Ta= 50°C 60%RH 240h
4	Low temperature operation test	Ta= 0°C 240h
5	Vibration test (non-operating)	Wave form : random Vibration level : 1.0G RMS Bandwidth : 10-500Hz Duration : X,Y,Z, 10 min One time each direction
6	Shock test (non-operating)	Shock level : 100G Waveform : half sine wave, 2ms Direction : $\pm X$, $\pm Y$, $\pm Z$ One time each direction
7	Altitude operating storage / shipment	0 - 10,000 feet(3,048m) 0 - 40,000 feet(12,192m)

Product Specification

7. International Standards

7-1. Safety

- a) UL 60950-1:2003, First Edition, Underwriters Laboratories, Inc., Standard for Safety of Information Technology Equipment.
- b) CAN/CSA C22.2, No. 60950-1-03 1st Ed. April 1, 2003, Canadian Standards Association, Standard for Safety of Information Technology Equipment.
- c) EN 60950-1:2001, First Edition, European Committee for Electrotechnical Standardization(CENELEC) European Standard for Safety of Information Technology Equipment.

7-2. EMC

- a) ANSI C63.4 "Methods of Measurement of Radio-Noise Emissions from Low-Voltage Electrical and Electrical Equipment in the Range of 9kHz to 40GHz. "American National Standards Institute(ANSI), 1992
- b) C.I.S.P.R "Limits and Methods of Measurement of Radio Interface Characteristics of Information Technology Equipment." International Special Committee on Radio Interference.
- c) EN 55022 "Limits and Methods of Measurement of Radio Interface Characteristics of Information Technology Equipment." European Committee for Electrotechnical Standardization.(CENELEC), 1998 (Including A1: 2000)

7-3. Environment

- a) RoHS, Directive 2002/95/EC of the European Parliament and of the Council on the reduction of the use of certain hazardous substances in electrical and electronic equipment, January 2003.

Product Specification

8. Packing

8-1. Designation of Lot Mark

a) Lot Mark

A	B	C	D	E	F	G	H	I	J	K	L	M
---	---	---	---	---	---	---	---	---	---	---	---	---

A,B,C : SIZE(INCH)

E : MONTH

D : YEAR

F ~ M : SERIAL NO.

Note

1. YEAR

Year	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010
Mark	1	2	3	4	5	6	7	8	9	0

2. MONTH

Month	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Mark	1	2	3	4	5	6	7	8	9	A	B	C

b) Location of Lot Mark

Serial No. is printed on the label. The label is attached to the backside of the LCD module.
This is subject to change without prior notice.

8-2. Packing Form

a) Package quantity in one box : 6 pcs

b) Box Size : 525mm × 314mm × 410mm

Product Specification

9. PRECAUTIONS

Please pay attention to the followings when you use this TFT LCD module.

9-1. MOUNTING PRECAUTIONS

- (1) You must mount a module using holes arranged in four corners or four sides.
- (2) You should consider the mounting structure so that uneven force (ex. Twisted stress) is not applied to the module. And the case on which a module is mounted should have sufficient strength so that external force is not transmitted directly to the module.
- (3) Please attach the surface transparent protective plate to the surface in order to protect the polarizer. Transparent protective plate should have sufficient strength in order to resist external force.
- (4) You should adopt radiation structure to satisfy the temperature specification.
- (5) Acetic acid type and chlorine type materials for the cover case are not desirable because the former generates corrosive gas of attacking the polarizer at high temperature and the latter causes circuit break by electro-chemical reaction.
- (6) Do not touch, push or rub the exposed polarizers with glass, tweezers or anything harder than HB pencil lead. And please do not rub with dust clothes with chemical treatment.
Do not touch the surface of polarizer for bare hand or greasy cloth.(Some cosmetics are detrimental to the polarizer.)
- (7) When the surface becomes dusty, please wipe gently with absorbent cotton or other soft materials like chamois soaks with petroleum benzene. Normal-hexane is recommended for cleaning the adhesives used to attach front / rear polarizers. Do not use acetone, toluene and alcohol because they cause chemical damage to the polarizer.
- (8) Wipe off saliva or water drops as soon as possible. Their long time contact with polarizer causes deformations and color fading.
- (9) Do not open the case because inside circuits do not have sufficient strength.

9-2. OPERATING PRECAUTIONS

- (1) The spike noise causes the mis-operation of circuits. It should be lower than following voltage :
 $V = \pm 200\text{mV}$ (Over and under shoot voltage)
- (2) Response time depends on the temperature. (In lower temperature, it becomes longer.)
- (3) Brightness depends on the temperature. (In lower temperature, it becomes lower.)
And in lower temperature, response time (required time that brightness is stable after turned on) becomes longer.
- (4) Be careful for condensation at sudden temperature change. Condensation makes damage to polarizer or electrical contacted parts. And after fading condensation, smear or spot will occur.
- (5) When fixed patterns are displayed for a long time, remnant image is likely to occur.
- (6) Module has high frequency circuits. Sufficient suppression to the electromagnetic interference shall be done by system manufacturers. Grounding and shielding methods may be important to minimize the interference.
- (7) Please do not give any mechanical and/or acoustical impact to LCM. Otherwise, LCM can not be operated its full characteristics perfectly.
- (8) A screw which is fastened up the steels should be a machine screw (if not, it causes metallic foreign material and deal LCM a fatal blow)
- (9) Please do not set LCD on its edge.

Product Specification**9-3. ELECTROSTATIC DISCHARGE CONTROL**

Since a module is composed of electronic circuits, it is not strong to electrostatic discharge. Make certain that treatment persons are connected to ground through wrist band etc. And don't touch interface pin directly.

9-4. PRECAUTIONS FOR STRONG LIGHT EXPOSURE

Strong light exposure causes degradation of polarizer and color filter.

9-5. STORAGE

When storing modules as spares for a long time, the following precautions are necessary.

- (1) Store them in a dark place. Do not expose the module to sunlight or fluorescent light. Keep the temperature between 5°C and 35°C at normal humidity.
- (2) The polarizer surface should not come in contact with any other object.
It is recommended that they be stored in the container in which they were shipped.

9-6. HANDLING PRECAUTIONS FOR PROTECTION FILM

- (1) The protection film is attached to the bezel with a small masking tape.
When the protection film is peeled off, static electricity is generated between the film and polarizer. This should be peeled off slowly and carefully by people who are electrically grounded and with well ion-blown equipment or in such a condition, etc.
- (2) When the module with protection film attached is stored for a long time, sometimes there remains a very small amount of glue still on the bezel after the protection film is peeled off.
- (3) You can remove the glue easily. When the glue remains on the bezel surface or its vestige is recognized, please wipe them off with absorbent cotton waste or other soft material like chamois soaked with normal-hexane.

Product Specification

Warranty for Non-Inclusion of Hazardous Substances in Products (ver.4.1)

Our company hereby warrants and guarantees that all of or part of products, including, but not limited to, the peripherals, accessories or (including your subsidiaries and affiliated company) directly or packages, manufactured and/ or delivered to your company indirectly by our company (including our subsidiaries or affiliated companies) are free from any of the substances listed in your company's Technology Standard or its subsequent revision, including the following articles,

1. Our company actually cooperates with environment-friendly policy pushed by your company and follows the total abolition schedule of Pb, Cd, Cr+6, Hg, PBB and PBDEs proposed by Hazardous substances management standard in your company
2. Our company don't excessively enclose to the noxious material including Cd, Pb in products and parts supporting to the department of DID in LG electronics. If the environmental accident is occurred by our company's mistake and insufficient improvement, acts on our company's responsibility
3. Our company ensure that all of information submitted to your company is not arbitrary estimation and is to the exact document based on reliable data.

By attached Data, Our company warrants this products confirm to following requirements.(Check each applicable item)

☒ Pb Free Soldering ☒ Pb Free ☒ RoHS Free ☒ TCO '03

Definition :

- Pb Free Soldering : Parts must meet DID's Heat resistance condition.
(Reflow Type:250℃,10sec, Flow Type : 260℃,10sec)
- Pb Free : Lead wire plating is Pb Free(Pb content < 1,000ppm) and Inner contact point and Body itself don't contain Pb(Pb content < 1,000ppm)
- RoHS Free : Part does not contain Pb,Cd,Cr+6,Hg,PBBs and PBDEs(Cd<100ppm,Others<1,000ppm) and supplier must submit evidences(ICP,AAS,UV-Vis,GC) certificated by authorised agency
- TCO '03 : Part meet TCO'03 and LG electronics requirement
(Cd<5ppm, Pb<50ppm, Hg<2ppm, Cr+6,PBBs,PBDEs<100)

Company name : LG-philips LCD

Date : Jan. 11. 2007
